

BF000044 – ESD flat brush, black 50 mm

The ESD flat brush -hard- 50 mm is specifically designed for cleaning tasks on electrostatically sensitive flat assemblies. The handle made of electrostatically conductive plastic ensures safe handling, while the incorporated natural bristles, mixed with conductive fibers, enable effective cleaning. The brush meets the ESD standard DIN EN 61340-5-1 and offers a resistance to ground of 10^6 to $10^7 \Omega$, making it ideal for use in ESD-protected areas. With a bristle width of 50x6 mm and a hardness classified as hard, this brush is robust and durable. The bristle color is black, which contributes to the professional appearance. This product provides a reliable solution for anyone involved in electronics manufacturing or maintenance, ensuring thorough and safe cleaning..

TECHNICAL SPECIFICATIONS

Hardness: hard

Width: 50 mm

Bristles: natural bristles / conductive fibers

Bristle color: black

Bleeder resistance: 10^6 - $10^7 \Omega$

ESD: yes
