BF000713 – ESD flat brush 18 x 6 mm

The ESD flat brush, measuring 18 x 6 mm with a bristle length of 15 mm and a handle length of 105 mm, is specifically designed for the safe cleaning of populated circuit boards. The brush is characterized by its hard texture and meets the ESD standard DIN EN 61340-5-1, making it the ideal choice for applications in ESD-sensitive areas.

The handles are made from electrostatically conductive plastic, while the bristles are made from a blend of conductive fiber and polyester and are available in black. The surface resistance of the brush ranges from 10^4 and 10^9 Ohm, highlighting its effective conductivity and minimizing the risk of electrostatic discharges. Ideal for technical professionals in electronics manufacturing and maintenance, this tool offers reliability and precision in the care of sensitive components.

TECHNICAL SPECIFICATIONS

Hardness: hard

Width: 18 mm

Brush length: 15 mm

Handle length: 105 mm

Bristles: polyester / conductive fibers

Bristle color: black

Length: 6 mm

Surface resistance Rs: 10^4 - 10^9 Ω

ESD: yes
