BF000714 – ESD flat brush 25 x 6 mm

The ESD flat brush, measuring 25 x 6 mm with a bristle length of 20 mm, is specifically designed for the safe cleaning of populated circuit boards. The handle, which has a length of 110 mm, is made of conductive plastic, facilitating handling and supporting electrostatic discharge. The bristles of this brush are made from a mix of conductive fiber and polyester, which not only provides the necessary hardness but also ensures compliance with the ESD standard DIN EN 61340-5-1. The surface resistance of the brush is between 10^4 and 10^9 Ohm, highlighting its suitability for sensitive electronic components. The black bristles of the brush are both robust and flexible, allowing for effective cleaning without damaging the components. These technical characteristics make the ESD flat brush an indispensable tool in electronics manufacturing and maintenance.

TECHNICAL SPECIFICATIONS

Hardness: hard

Width: 25 mm

Brush length: 20 mm

Handle length: 110 mm

Bristles: polyester / conductive fibers

Bristle color: black

Length: 6 mm

Surface resistance R_s : 10^4 - 10^9 Ω

ESD: yes
