BF000715 – ESD flat brush 30 x 11 mm

The ESD flat brush, measuring 30 x 11 mm with a handle length of 140 mm, is specifically designed for the safe cleaning of assembled circuit boards. The bristles of this brush are 20 mm long and made from an effective blend of polyester and conductive fibers, maintained in the color black. The handle made from conductive plastic additionally ensures optimal handling.

The brush is electrostatically conductive and meets the ESD standard DIN EN 61340-5-1, making it suitable for use in ESD-sensitive areas. The surface resistance of the brush is between 10^4 e 10^9 Ohm, which allows for the safe dissipation of electrostatic charges. The hardness of the brush is classified as hard, ensuring effective cleaning without the risk of damaging the components.

TECHNICAL SPECIFICATIONS

Hardness: hard

Width: 30 mm

Brush length: 20 mm

Handle length: 140 mm

Bristles: polyester / conductive fibers

Bristle color: black

Length: 11 mm

Surface resistance Rs: 10^4 - 10^9 Ω

ESD: yes
