

## 3110.850 – Waste bags

This gusseted bag made from antistatic, amine-free polyethylene is specifically designed for safe disposal in ESD-protected areas. The pink trash bags are recyclable and feature both the ESD warning symbol and the recycling symbol, confirming their compliance with the ESD standard DIN EN 61340-5-1. With a width of 300 mm, a length of 600 mm, and a maximum side gusset of 200 mm, these bags offer a volume of 30 liters, ideal for containers up to about 25 liters. The material thickness is 0.025 mm, ensuring good tear resistance. Each roll contains 500 pieces, allowing for efficient use and storage. Ideal for technical environments where both functionality and environmental protection are prioritized.
