

**Model 461995**

**Laser Photo / Contact Tachometer**

## Introduction

---

Congratulations on your purchase of Extech's Laser Photo/Contact Tachometer, Model 461995. This Tachometer provides contact/non-contact RPM and Linear Surface Speed measurements. The laser pointer beam provides accurate long distance measurements for photo tachometer measurements. This meter, with proper care, will provide years of safe reliable service.

## Safety

---

CAUTION

Laser Radiation

1. Use extreme caution when the laser beam is on
2. Do not point the beam toward anyone's eye
3. Be careful not to let the beam strike the eye from a reflective surface
4. Do not use the laser near explosive gases or in other potentially explosive areas

## Meter Description

---

1. Photo Tachometer sensor and laser source
2. LCD display
3. MEMORY button
4. Function switch
5. Contact tachometer rotating ring
6. MEASURE button
7. Battery compartment (rear)

# Meter Operation

---

## Reversible LCD Display

The 461995 LCD display indicates Photo Tachometer measurements in one direction and Contact measurements in the opposite direction. This permits the user to easily read the measurement digits in both measurement modes with the meter held in either direction.

## Photo Tachometer Measurements (refer to diagram below)

1. Apply an appropriately sized square piece of reflective tape to the surface of the object under test.
2. Move the Function switch to the PHOTO position.
3. Point the laser pointer end of the meter toward the device under test at a distance of 2" to 79" (50 to 2000mm).
4. Press the Measure button (located on the right side of the meter) and align the laser pointer beam with the reflective tape.
5. Verify that the Monitor Indicator appears on the upper left hand section of the LCD when the object under test passes through the light beam.
6. Release the Measure button when the RPM reading stabilizes on the LCD.
7. If the rpm is under 50, apply additional squares of reflective tape. Divide the reading shown on the display by the number of pieces of reflective tape squares to calculate the actual rpm.

**NOTE:** Bright ambient light may interfere with the reflected light beam. Shading the target area may be necessary in some cases.

**CAUTION:** Rotating objects can be dangerous. Use extreme care.

### Contact Tachometer RPM Measurements

1. Move the Function switch to the CONTACT position.
2. Press the Measure button while lightly pressing the rotating ring against the center opening of a rotating shaft.
3. Release the Measure button when the display stabilizes (approx. 2 seconds).

### Linear Surface Speed (ft/min or m/min) Measurements

1. Slide the Function Switch to "SURFACE SPEED ft/min" or "m/min" position.
2. Install the surface speed attachment on the meter rotating ring.
3. Press the Measure button and hold the surface speed wheel against the device being measured.
4. Release the Measure button when the display stabilizes (approx. 2 seconds).

### MIN/MAX and Last Reading Memory Recall

The 461995 can record Maximum, Minimum, and Last Reading for the period of time the Measure button is held. These stored values can then be read directly on the meter's display. The memory will automatically clear after approximately 10 seconds of meter inactivity. Access the memory data immediately after the measurements have been taken as follows:

1. Press the Memory key once and hold it down: The Last Reading is displayed followed by the "LA" icon.
2. Press again and hold: The Maximum value is displayed followed by the "UP" icon
3. Press again and hold: The Minimum value is displayed followed by the "dn" icon

## Battery Replacement

---

The low battery indication appears as "LO" on the display. To replace the batteries, slide the rear battery compartment cover off of the meter, replace the four 1.5V AA batteries, and replace cover.

You, as the end user, are legally bound (**EU Battery ordinance**) to return all used batteries, **disposal in the household garbage is prohibited!** You can hand over your used batteries / accumulators at collection points in your community or wherever batteries / accumulators are sold!

**Disposal:** Follow the valid legal stipulations in respect of the disposal of the device at the end of its lifecycle

# Specifications

## General Specifications

<b>Circuit</b>	Custom one-chip LSI microprocessor circuit
<b>Time base</b>	Quartz crystal 4.194 MHz
<b>Display</b>	Reversible 5 digit 0.10mm (4") LCD display
<b>Laser light source</b>	Less than 1mW; Class 2 red laser diode (645nm approx.)
<b>Detecting Distance</b>	50 to 2000 mm (2 to 79") depending on ambient light and RPM
<b>Memory</b>	Last reading and MIN/MAX readings
<b>Operating Conditions</b>	0 °C to 50 °C (32 °F to 122 °F); RH 80% Max
<b>Power Supply</b>	4 x 1.5 V AA batteries
<b>Power Consumption</b>	20mA DC approx.
<b>Weight</b>	300g (10.6oz) including battery
<b>Size</b>	210 x 67 x 38 mm (8.5 x 2.6 x 1.5")
<b>Accessories</b>	(4) x 1.5V batteries, reflective tape 600mm (24"), surface speed/rpm rotating attachments, and carrying case

## Range Specifications

	<b>Range</b>	<b>Resolution</b>	<b>Accuracy (%rdg)</b>
Photo Tachometer	10 to 99,999 rpm	0.1 rpm (<1000rpm) 1 rpm (>1000 rpm)	± (0.05% + 1d)
Contact Tachometer	0.5 to 19,999 rpm	0.1 rpm (<1000rpm) 1 rpm (>1000 rpm)	
Surface Speed	0.2 to 6560 ft/min	0.1 ft/min (<1000ft/min) 1 ft/min (>1000ft/min)	± (1% + 1d)
Surface Speed	0.05 to 1999.9 m/min	0.01 m/min (<100m/min) 0.1 m/min (>100 m/min)
